

FITTING INSTRUCTIONS FOR STANDARD BOARDS

- Please use screw fixings with caps supplied (4 x screws for each corner of the board and caps).
- The board must be mounted onto a brick or stone built wall, not a plaster board wall.
- Only correct raw plugs and screws for this type of surface should be used.
- To support the weight of the board it is recommended in addition to fitting the supplied metal brackets that a piece of timber at least half the width of the board is fixed to the wall at the base of the board to help support the weight.

FITTING INSTRUCTIONS FOR LARGE HEAVY BOARDS

- The board must be mounted onto a brick or stone built wall, not a plaster board wall.
- Only correct raw plugs and screws for this type of surface should be used.
- To support the weight of the board it is recommended in addition to fitting the supplied metal brackets that a piece of timber at least half the width of the board is fixed to the wall at the base of the board to help support the weight.

Failure to follow these instructions may result in the board moving or becoming detached.
