

# How to look after Your Board

**visual**  
SYSTEMS healthcare

We recommend that you clean the entire board with our board cleaning fluid at least once a day, as this leaves a protective film on the surface for easy writing and erasability.

## Cleaning Guide:

- 1) Remove all writing from the board using a clean dry cloth or tissue
- 2) Spray the board with our Visual Systems "Whiteboard Conditioner & Cleaner"
- 3) Wipe with a clean cloth or tissue until board is clean and free from stains. Rub the liquid evenly into the board until a thin "oily" film is left on the surface. This improves the inks erasability.
- 4) If ink residue remains on the board after cleaning, spray our board cleaning fluid in the troublesome area, leave for 30 seconds and re-clean.

## Do`s

Allow the ink to dry before erasing, (roughly 2 minutes)

Always use a clean, dry, soft cloth or tissue to erase writing, using a smooth and gentle cleaning motion.

Replace all dirty cloths and tissues immediately to avoid ink contamination of the board surface

## Don`ts

Don't use board erasers, abrasives, alcohol wipes, wet wipes, wet cloths, hand gel or surgical wipes to clean this surface.

Don't use any household cleaning fluids such as bleach, window cleaner, polish, Jiff or Flash to clean this surface.

Don't use excessive force, heavy rubbing, scratching or scrubbing to clean this surface.

Avoid dragging magnetic indicators, symbols, name plates or domed magnets across the surface of this board.
